4-6-2 LOCOMOTIVE 'PRINCESS' CLASS

Locomotives of this class modelled by Hornby: Princess Elizabeth, The Princess Royal, Lady Patricia, Princess Beatrix.

List of Parts

Table with 6 columns: Ref. No., Item, Ref. No., Item, Ref. No., Item. Lists parts such as Coupling Rod L/H, Valve Gear Assembly, Motion Bracket, Underframe, and various screws and washers.

Westwood, Margate, Kent, CT9 4JX, England.

SERVICE SHEET No. 149A Issued June 1992

Introduction How to choose the best class How to make the gold in Zenonia 5 How to get the stones made Quick Agriculture and grinding for gears Complete Title Raid Mode Explained Introduction Information After playing a couple of times using all types of character building. We have compiled this guide to help you start the game quickly and easily. How to choose the best class based on our different games of each class of the game. We present the following comments on the classes and their functions in the game. The best class PvP is Pure with Berserker coupled with Pure with Paladin. The simplest class to complete the game in normal mode is the hybrid 2 STR and 1 CON Paladin. The best class PvE is Pure INT Wizard and Pure STR Paladin. The weakest class is the Mechanical one, however, if properly equipped with complete elements in EVA, they gain strength and become equal with the other classes in PvE and PvP. However, the likelihood of winning and killing is still 50/50 as a strong mechanic completely ingrained. How to build your characters in Zenonia 5 characters Gamelytic has written four different guides to help you determine the statistics and abilities. Use these guides to help you. Zenonia 5 Berserker Guide Zenonia 5 Paladin Guide Zenonia 5 Mechanic Guide Zenonia 5 Wizard Guide How to make gold in Zenonia 5 Gold can be very important or almost useless depending on your class and construction. In general, you will spend most of your gold on the purchase of potions and repair tools. However, use the following game strategies to help you make more Zenonia 5 gold. 1. Save often and zero when you die The fastest way to lose your gold in Zenonia 5 is when you lose both the duration of the weapon and the gold when you die. To avoid losing gold and do more, just save as often as possible. When you die, it is enough to return to and avoid the penalty altogether. It should be noted that nothing is lost against other bosses or PvP or Abyss battles. 2. Grind Enemies of Lower Level To Earn Gold, you want to be able to kill enemies quickly and efficiently. Consider grinding lower level enemies if you cannot advance higher. You want to cross the maps quickly and efficiently to kill the mobsters. 3. Use SP Absorption titles and tools to lower the cost of SP suspension you can make more gold when you don't need to spend them on SP potions. If possible, always keep your SPs absorbing gears and titles if you can get them early in the game. In general, SP absorbs statistics only appear in Unique gears or Legendary graduated Zenonia 5. 4. Improve Gears at Tank Enemies and Avoid the Cost of HP Potion If you're taking too much damage from enemies, you'll find that your pocket will go down pretty fast too. When this happens, upgrade and make your gears stronger. By taking less damage, you use fewer potions and die less frequently. Tools are essential to help you with more gold. 5. Execution and Movement Learn the attack patterns and timing of your enemies. Your objective in the game is to learn them so well that you don't get hit at all. Getting shots wears out your armor and can waste time when you die. Learn to perform your movements and attacks. Discover the animation time of the different abilities. 6. Buying larger inventory spaces is essential for you to buy additional bag spaces if you want to grind easily for ZEN. Because of all the equipment you have, they can take up quite a bit of your inventory space. With the largest bag, you don't need to travel around the city as often as possible. Higher-level gears can sell for a lot of gold. And a full bag can sometimes give 50-60k or even more. How to Get Fairy Stones Quickly extracting fairy stones is important to help you get it. To do this You can start new characters because They can extract the stones made quickly enough. The rune that you want to have in the end is a three-pronged crack with an extreme holy attack. You can send and receive the various items related to Fata through the banks. However, to get a high-level skill stone, level, still want to grind with your higher level characters. Even if the Fairy is like a companion who fights beside you, but why She doesn't really join the battle but rather she gets you passionate here and there and amplifies your attack effects. Fairy in Zenonia 5 is more like equipment than a pet. In this section we'll see how the fairy works. Sync Energy Extract Man as your fairy rises to level and fights alongside you, you will get "communion" or "synchronous energy". With this you can extract the Runes of the Fairies or the Stone of the Fairies. Fairy Runes may have different statistics, but mainly in Attack, Defense or Normal. In general you want to get the Rune Offense for further damage and debuff. Each of the elements has the ability to slow down or freeze the enemies. Fire can cause further combustion damage. Runes can be equipped with a maximum of three slots to add skill stones. Factory stones can also be obtained by extracting Sync energy. Skills can include fans who increase the various statistics such as ATT, DEF and more. Our personal favorites are the stones that decrease your SP uses. Finally, you should always extract the stones or runes as soon as they become available. And always put on new runes that you get. Even if it doesn't show on the statistics screen, but your fairy gets stronger as they equip and upgrade their runes to higher levels. Agriculture and grinding for gears At final game levels, the damage classes have better times to grind for gears and the with build are stronger in PvP. If you are really serious about the game, we recommend you make two different build to fully enjoy the game both from the point of view of the crawling Abyss and PvP Fighting. Abyss Crawling can give you some of the best Legendary or Unique rated gears. However, PvP typically only give you up to Magic and Epic ranked gears. Your goal is to use both of these methods to cultivate the strongest set of possible equipment. Before entering the details about the various Zenonia 5 equipment, we will go beyond some with their types and slots. Types of gear slots Your Hero Zenonia 5 Character has a pair of different gear slots that will be used in the game. The gears have predefined statistics and A «magic» that are coupled with magical or higher gears. We will soon examine the different gear classification. The following is the list of gears and their statistics: «Default.» Arma: 2nd weapon attack (Shield): Defense head: Defense glove: Defense armor: Defense shoes: SP Cloak: HP Ring: Crit Rate Amulet: Evade Gear Ranking and rarity Gears are available in different rankings and rarities that can increase their predefined powers. In general, the upper rank gears will have higher statistics than their counterparts. Furthermore, it is possible to perfect only magical or higher gears. Magical gears are equipped with 1 further increase in statistics. Rare gears are usually equipped with 2 Stats boost. Upper rank gears also have additional updating stone slots. Normal: «White magic» Rare blue «Yellow epic» Unique purple «Legendary orange» «Red How to get gears in Zenonia 5 There are some ways to get the various gears of the game. 1. Cultivate monsters. 2. Hunting for the «Specials» Mini Boss Mob to get better drops. 3. Combine using combines parchments and collecting the various materials. 4. Sometimes via RiMente Quest 5. Purchase using Zen and through random equipment box 6. Winning and completing PVP struggles for random equipment 7. Complete PVP daily events and earn casual Box Kit 8. Cross the secret of the abysses to have the € opportunities to make a good Jump It seems that each of these methods can produce gears of any type other than a «Combiné», because comes to the gear you are building. Confining to refine your gears Zenonia 5 can improve Predefined gear statistics. Each gear has a certain level of statistics level of sophistication. In general it is about 12-15. However, the higher level goes, the more likely they can be completely destroyed. Destroyed gears require the store item Scroll that costs 100 ZEN. Therefore, it is necessary to finish the strong gears only if you have duplicates as replacements. In addition, refine your strong gears before making further updates in inserting update stones or even evolving them. Level 1: 200 Level Gold 2: 800 Level Gold 3: 1800 Level Gold 4: Insert Upgrade Stone in Slots You can feed your gears further into the game by inserting update stones. It is possible to obtain updating stones of their respective level from them through blacksmiths in different stones. The gears can be melted into one to create the various stones. The amount of statistics added by the stones is based on the gears used to make them. However, the following points should be noted about the Zenonia 5 update stones. 1. The two melted gears shall be of the same degree. 2. The level of the stones created is based on the gears. 3. Higher level field more statistics. 4. The stones can only be inserted in higher gear. Because of this, the best or strongest gears you get in the game should have as many cracks to update stones as possible to put in as many Zenonia update stones. The evolution of the Zenonia 5 tool is a feature of the cash shop that uses ZEN to power your gears. We will prepare the process to determine whether or not the tool evolution process is valid for you. Decide your own gears to evolve: first, the evolved gears no longer receive upgraded stone slots and can still be broken through the refining process. Therefore, it is necessary first to check for the level of refining and stone cracks before starting the evolution process. The evolution of gears will further stimulate gears by level of evolution. Your Gear: First you will spend 25 Zen to start the process of evolution of tools. At this point the tool into evolutionary gears is converted. Evolutionary gears will have a further impulse of statistics. It will also show the highest level of evolution, effect of evolution and evolution points necessary to level the level. On your equipment: you can enter additional zen in gears to make them more powerful. You will earn evolution points that can: «level up» the gear further. Every additional evolved level adds that many more statistics to the order. ESPLUCE exigns Example: if your evolved gear has effect AT + 3%. Each Level adds 3% to the default attack value. Evolving you can do it the level of evolution 2. Then the effect becomes ATT + 3% * 2 = 6%. Evolution of your Zenonia 5 Gear without ZEN: it should be noted that «Special» «A» the enemies of the mini bosses can evolve your gears when you kill them. All your gears «A» «A» Gears will receive points of evolution when agricultural and kill the Mini boss with the special orange magic circle below them. This is a cheaper way if you don't want to spend real money to evolve your gears. The best statistics to get the best statistics about your march on your equipment depend mainly on the type of classes and build you are working. However, we will provide the following pointers. Boost statistics are usually more important than HP and SP. Usually you want to keep your damage out while still able to survive enemy successes. This means that they aim for Dex, Crit rate and finally att. Complete title information Most game titles will improve your various titles, we ranked these titles in statistics. You can check to see the best to use for your purpose. Using the right title for your class is essential. In general, each class can benefit from the titles that guarantee all the statistics. However, if you are also build as well as Int Zenonia 5 Wizard or Full Dex mechanics, the increase in specific statistics will help. However, it should be noted that these builds can also benefit from the veteran hero that dA 1k HP. Attack and defense + titles Even fantastic to increase your skills to fight killing faster or taking fewer damage. All Slaughter Goat statistics: All statistics +5 Kill 50 Baphometers Frog Killer: All statistics +10 Kill 50 Venom Frogs Winner: all all +10 11 Zenonia 5 PvP wins entry Slaughterer: all stats +15 Kill 50 Dark Ents Cerberus Killer: all stats +20 Kill 50 Cerberus Champion: all stats +20 101 PVP wins Battle Road: all stats +30 1001 PVP wins God of Victory: all stats +50 5001 PVP Kumtra Killer: Strength +20% Kill 50 Kumtras Legendary Miner STR+15% Mine 100 Orichalcons Constitution Rookie Miner: Constitution+5% Mine20 Bronze Top Class Miner: Constitution +10% Mine 50 Mithril Super Miner: Constitution +15% Mine 50 Orichalcon Intelligence Fairy Lover: Intelligence +10% Use 10 Stones Awakening or Extract Skill Stones (20 Stone) Fairy Mania: Intelligence +20% Use 20 Awakening Stones or Extract Skill Stones (40 Stone) Dexterity Smuggler: Dexterity +10% Talk to the Dark Merchant (Agron Village) 20 times Pro Smuggler: Dexterity + 15% Talk to the Dark Merchant (Agron Village) 30 times Special Effect Titles HP Absorb Jackpot: HP Absorb +2% Have Exactly 7777 Gold Invincible Hero: HP Absorb +3% Use 50 Origin of Life SP Absorb Cool User: SP Absorb +2% Play for Two Hours The Resurrected: SP Absorb +3% Use 20 Origin of Life lives Unknown Titles Apprentice Blacksmith: (?) Define at least 10 times Skilful Blacksmith: (?) Define at least 50 times Divine Blacksmith: (?) Refine at least 100 times the apprentice: (?) Combine at least 5 times Skilful Combine: (?) Combine at least 25 times Alchemist: (?) Combine at least 50 times Clincher: (?) PurchaseSubquests Rookie Scanner: (?) Use 20 Scanning Scrolls Scanner Apprentice: (?) Use 100 Scand Scrolls Pro Scanner: (?) Use 500 Write Scan Zenonia Mania: (?) Play 20+ hours Traveler Terrain: (?) Visit the Abyss 50 times Earth exceeds: (?) Visit the abyss 250 times Monster Hunter: (?) Visit the RAID mode 50 times Devil Monster Hunter: (?) * Visit the RAID mode 250 times the RAID mode has been explained You can enter the RAID mode via your character status screen as if you want for the Zenonia 5 PVP and ABYSS mode. After entering you will see a Mobs and boss roster you can fight. The mobs are listed by their levels, you will see some normal mobs and some leaders with the probability of 50%. It is therefore possible to process to select a mob to switch to the next screen. Note that this step will be: «A» «A» "NO deduct your Zen. You will therefore be able to select: «A» «A» "Mercenaryari "which are the other players to fight together with you «A» «A» at Cost of 50 additional Zen. These mercenary players will be «A» «A» "you will not receive zen if they assist them. Players are typically strong with at least avatars purchased. You can also check the amounts of ATT and DEF have. These players will fight next to you in battle. However, they are still controlled by to which they can be rather weak. They are more or less cannon fodder against the most serious garments. Possibility of 50%! It simply means that challenging the Zenonia 5 boss, you will get 50% more than Exp and Evolution points for Zen spent. You don't earn any gold or additional gears. However, it seems that boss fighting simply won the effort. Although you make 50% more evolution points and experience points, the odds are that you could ruin and lose your Zen. If you win the RAIDs you will earn the quantity of evolution points indicated on the roster screen on experience points. If you lose in raid, you don't earn anything, losing both the entrance fee and the mercenary fee if you bought the purchase. The Zenonia 5 RAID mode isNo use stimulating your characters. Do not earn additional gears which is really what most players end up doing in Zenonia 5 End Game. There is no point in gaining further points of experience after reaching the level stage. There is no point in getting points of evolution while it is possible to cultivate mini bosses for evolution of the gears of Zenonia 5. In short, never waste your money on RAID mode. Unless you don't have the money and you just want to maximize your character as quickly as possible. But if you're really the dedicated one, it's just better to cultivate the mob for the possibilities of making stronger gears.
